

Saxon Teacher Algebra 2 (3rd Edition) Corrections

Lesson 40

#19. The teacher incorrectly states that 28 divided by 1.4 is 10. She goes on to correct the problem in writing but not verbally.

Lesson 42

Example 3. In steps 2 and 3, the number in the denominator should be 1×10^{-19} , not 1×10^{-18} . The final answer is correct.

Lesson 63

Example 1. The final answer should be $-16R - 13.2U$, not $16R - 13.2U$. The teacher leaves off the negative sign but correctly interprets the direction as west.
